

BOW SLING INSTRUCTIONS

To put the BOW SLING on (right or left handed), put it over your head and arm and position the hooks on your side. Hook bow cables (or string) on the hooks see (Fig. 1, Fig. 7).

Adjust the sling length with slide buckle, so that your hand is resting on the grip in a relaxed position. To release the cables (or string) from the hooks, bring the handgrip away from your side at a slight angle, then bring the bow-string back toward you and lift off.

Put on the holster by separating the Velcro strips. Loop the strip over your belt and adjust for length (Fig. 2).

When on a stand, place the end of the bow (Fig. 2, Fig. 6) into the holster and hook one of the hooks to the cables (or string), to stabilize the bow. To release the bow, grasp the handgrip, reach up and detach the hook from the cables (or string) and lift the bow out of the holster.

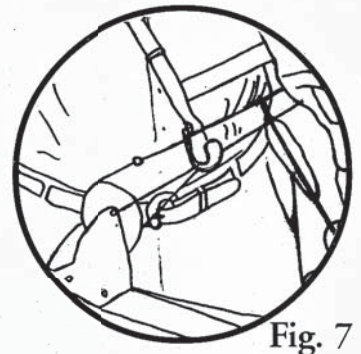

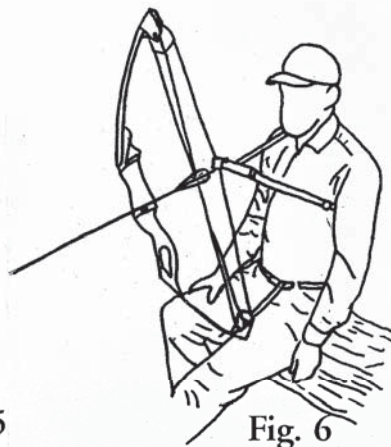

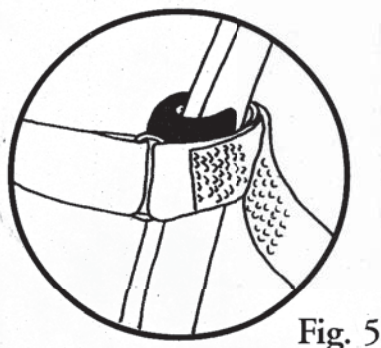

BACKPACKING POSITION

To put on, separate the Velcro for the width adjustment (Fig 4). Take the hook and go around the limb and hook it on the limb, then using the Velcro strip, wrap it around the hook and attach to the Velcro on the back of the sling (Fig. 5) Repeat for the other limb.

To use, place the sling over your head and arm. This will put the bow across your back (Fig 3).
